SUMMARY

I started my career in sales, which taught me that good marketing is measured by the conversations it creates for the sales team. For the past 4 years I have been a digital marketer for B2B SaaS startups and mid-sized companies. I understand what the business needs, choose the right channels, build a plan for each and see it through: SEO and AI search, Google and Meta Ads, social media, email, ABM and webinars. Along the way I have grown organic traffic by 50%, cut cost per lead by 20% and helped generate 3–4 qualified sales demos a week across the US, UK and GCC.

CORE SKILLS
